Forecast for Sunday 26 Jun 2022

Weather: Rather cloudy across the Black Mountains and the west of the Park where scattered showers likely. Drier and brighter towards Abergavenny with periods of strong sunshine. Showers likely merging at times to form a more persistent period of rain, especially across western facing slopes and more widely during the evening. Strong southwesterly winds may gust to gale strength on peaks above 800m, with a lower risk of these gusts at lower levels where funnelling occurs.

Chance of cloud-free hill tops above 600m: 70% for most of the day, dropping to 30% in prolonged rainfall and also across mainly western facing slopes this evening.

Low cloud and visibility: Broken cloud predominantly around 800-900m but occasionally lowering to 400-500m in any passing showers, shrouding the higher routes. Cloud bases expected to lower to these levels this evening, mainly on western facing slopes. Visibility generally good beneath the cloud, reducing to moderate or poor in showers or rain.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Winds will be strong all day, with gusts to 50mph possible above around 800m giving very difficult walking conditions, with a significant risk of being blown over. Be sure to wear appropriate footwear with good grip in addition to packing windproof and waterproof layers.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Sun 26 Jun 2022	4.6mm	9mm	9mm

Forecast for Monday 27 Jun 2022

Weather: A cloudy start with showers, potentially heavy, merging to form longer spells of rain. These showers easing and clearing to the east by mid-morning, thereafter largely dry with sunny spells. Some isolated showers may develop in the afternoon. A fine and dry evening with some higher-based cloud spilling eastward turning late sunshine hazy.

Maximum wind: Westerly 15-20mph, becoming southwesterly 20-25mph, gusting 30-35mph on summits after midday.

Chance of cloud-free hill tops 600m: 30% to begin, rising to above 90% from mid-morning as showery rain clears.

Low cloud and visibility: Cloud banks covering slopes above 500m initially before rising well clear of summits from mid-morning. Visibility poor in showers or longer spells of rain, improving to very good with distant hills clearly visible.

Temperature: **Valleys:** Plus 11 Celsius, rising to plus 18 Celsius.
At 600m: Plus 6 Celsius, rising to plus 9 Celsius.
Freezing level: Above the summits.
